

Emergency Procedures

Emergency Phone

There is presently no emergency phone on the Club premises. In an emergency you will need to use a cell phone.

Emergency Phone Numbers

9-1-1

First Aid Kits

The First Aid kits are located in kitchen and tool/equipment rooms of the Clubhouse.

AED

The Automatic Emergency Defibrillator (AED) is located on the wall to the right of the kitchen entrance in the Clubhouse.

Emergency Location

The club is located on McCowan Rd. 2 km north of Aurora rd.

Archery Safety Best Practices

- Before using, always inspect your bow and arrows for defects or disrepair, including wear, cracks, twisting, or other damage to the bow, bowstring, cables, pulleys, and arrow shafts, nocks, and fletches.
- Assure yourself that all screws are tightened and bow accessories are properly attached.
- If the archery equipment fails your inspection remove it from use until it has been repaired. Archers that are part of a group should inform the coach.
- Pay attention when stringing a bow to assure that the bowstring is properly fitted in both of the bow tips. Use a bow stringer to string long and recurve bows.
- A good safety practice is to use both an arm guard and a finger tab or archery glove to protect your forearm and fingers, respectively, from the bow string.
- Before drawing the bow, always thoroughly inspect the line of sight to the target and areas to either side of the target to assure these arrow-flight zones are clear of people, pets, or other non-intended targets.
- Never draw a bow and point the arrow at or in the direction of another person.

- Do not shoot an arrow into an area where its path cannot be followed or straight upwards into the air.
- Only draw the bow when pointing the arrow at a target.
- Never draw back a bowstring further than the length of the arrow being used.
- Do not release a bowstring unless it has a nocked arrow.
- Always follow all instructions of the Archery Range Leader while at an archery range.
- When at an archery range, do not retrieve your arrows until the “stop shooting” and “all clear” signals have been given. Likewise, do not move past the firing line to pick up a dropped arrow or other equipment until these signals have been given.
- Never pass in front of other archers while at an archery range. Stay behind the archery shooting line.
- Stand to one side of the target when pulling out arrows.
- If you must search for arrows behind the target, let other archers know where you are by placing your bow in front of the target or having another archer stand in front of the target.
- Always carry arrows with the points facing down and do not run while carrying arrows.
- If you are injured while practicing archery, notify your project leader, parent, or guardian. Seek medical attention if the injury is serious.
